

The NIHR Innovation Observatory; Industry's gateway to NICE

Market Access in England and Wales

UK Pharmascan

In order for NIHR IO's briefing process to run smoothly, we rely upon pharmaceutical companies to provide us with regular updates on estimated regulatory and marketing authorisation plans. UK Pharmascan is an on-line database, hosted by NICE. It enables pharmaceutical companies to consolidate the information needed to underpin UK market access and is the prime source of information for new medicines, indications and formulations.

It allows companies to control their data, managing and updating it regularly. This data is only available to you, UKPharmascan and NIHR IO under the strictest confidentiality provisions. **For more information and to register your company visit:** ukpharmascan.org.uk
